

John J. Lormon, Partner

Practice Areas	Energy Environment and Natural Resources Land Use
Admissions	California Massachusetts
Address	525 B Street, Suite 2200 San Diego, CA 92101
Direct Phone	619.515.3217
Direct Fax	619.744.5417
Email	john.lormon@procopio.com

Professional Summary

John focuses his practice on environmental and energy matters. He is the chair of Procopio's Energy and Environment Practice Group.

John provides counsel for projects requiring environmental permits to meet the Clean Water Act, California Water Code, endangered species, climate, and CEQA/NEPA obligations. John has been lead counsel for large-scale biofuels, food product and food processing facilities, desalination plants, waste water treatment plants, hotels, and a variety of other industrial, commercial, and residential developments. He also provides compliance counseling on hazardous and universal waste, Prop 65, asbestos abatement, and stormwater. In addition, John represents clients in defending against agency, citizen, local, state, and federal environmental enforcement claims.

John has provided permitting, power purchase agreements, analysis and written submittals related to CPUC integrated resource and long term procurement plan proceedings; provided advice related to decarbonization of projects, as well as counsel to energy project entity formation and financing.

Prior to joining Procopio, John led the environmental practice group for Gray Cary Ware & Freidenrich (now DLA Piper) for eight years. He was appointed by the Governor to two different State Boards; he has served on the California EPA Blue Ribbon Commission, the Metropolitan Water District's Blue Ribbon Committee, and was appointed by the Mayor to the City of San Diego Solid Waste Hearing Panel.

Representative Matters

Environmental

- Ahead of schedule, obtained Clean Water Act dredge and fill permits and state water quality certifications for several home development projects dealing with complex Waters of the U.S. and Waters of the State impact avoidance and mitigation issues.
- Negotiated multi-million dollar reduction of penalties under Regional Water Quality Control Board's administrative enforcement action, related to an industrial operator's alleged release of chlorinated solvent that impacted a school site.
- Successful defense of class action tort litigation filed by homeowners alleging harm from vapor intrusion, and diminution in property value.
- Removed client from involvement in Clean Water Act citizen suit alleging exceedance of stormwater effluent and receiving water limitations by showing the client's business was not within one of the SIC Codes which subject businesses to the Industrial General Stormwater Permit obligations.
- Resolved questions related to mitigation bank client's ledger tracking of mitigation credits so mitigation bank would be entitled to reopen and again sell credits with a favorable price-to-ratio of credits sold.
- Negotiated compliance order which allowed the client to reopen a large downtown high rise office building that had been summarily shut down by the Air Pollution Control District due to alleged releases of asbestos containing material, and helped to establish that an "occurrence" existed that triggered coverage under a pollution legal liability policy.
- Provided guidance in the development of universal and hazardous waste policies, training materials, and standard operating procedures for large telecommunication client; in that case saved millions of dollars in penalties and costs in negotiations of the Judgment on Consent with the California Attorney General and the District Attorneys.
- Provided analysis and advice on Proposition 65 issues to sophisticated national clients by working to create a list of possible scenarios (and to answer those hypothetical circumstances), with the goal to be out-in-front of these issues for the company; and the issues that might arise with their contractors, suppliers, and customers.

Energy

- Provided strategic legal advice to client developing biofuels research project, and helped them to

obtain authorization to capture local algal DNA strains , with the goal of increasing the fuel value for a largescale production of carbon neutral biofuels.

- Assisted client in arguing for inclusion of more geothermal power in the CPUC's Integrated Resource Plan – Long Term Procurement Proceeding to ensure that load serving entities (LSEs) meet targets that allow the electricity sector to contribute to California's economy-wide greenhouse gas emissions reductions goals.
- Advised energy start-up on strategies to maximize return on investment while avoiding regulation as a utility under state law.
- Drafted and negotiated power purchase agreements for solar and wind distributed and utility scale projects.
- Lead counsel on sale of excess power generated at the Valdez Terminal for Alyeska Pipeline Services Company.
